

Entities and Attributes

Customer Attributes:

- Customer_id(Primary Key)
- Name
- Email
- Password
- Shipping address

Represents people who purchase products from the store. Each customer has a unique ID, and essential contact and login information, as well as a shipping address.

Employee Attributes:

- Employee_id(Primary Key)
- Name
- Email
- Password
- Access level

Represents store employees. The access level creates different roles (manager or regular employee). Combined with the ID and login info, each employee is uniquely identifiable.

Cart Attributes:

- Cart_id(Primary Key)
- Customer_id(Foreign Key)

Each customer can have one active cart. This entity ensures a one-to-one relationship between customers and their carts.

Cart_item Attribute:

- Cart_item_id(Primary Key)
- Cart_id (Foreign Key)
- Product_id(Foreign Key)
- Quantity

Represents items added to a cart. Each entry includes the product and how many units the customer wants to purchase. It connects products with carts and allows tracking of the cart content

Product Attributes:

- Product_id(Primary Key)
- Name
- Description
- Category
- Price
- .Stock Quantity

Represents items available for purchase. Each product has essential details such as name, price, and availability.

Order Attributes:

- Order_id(Primary Key)
- Customer_id(Foreign Key)
- Order Date
- Status
- Shipping Address
- Billing Address
